-------------------	---------------------------------	---

- HWASEUNG BULGARIA (HSABG) aims to increase the environmental awareness of the individuals, institutions and organizations with which we are in direct and indirect interaction in the business lines we are active in, and to support local and It accepts it as its duty to fulfill its environmental responsibilities towards its regional neighbors, to protect the environment and and to create systems based on the effective use of natural resources and to ensure their continuity.
- In line with this policy, we will;
- Fulfill the legal requirements related to the environment and take the necessary measures with the environmental dimension and impact analyses we will conduct and continuously improve our ISO 14001:2015 Environmental Management System,
- It undertakes to monitor environmental publications and to fulfill its obligations to comply with standards, current laws and regulations.
- It keeps environmental pollution under control by minimizing it with an environmental management system.
- It supports all its employees and subcontractors/suppliers to be sensitive to the environment.
- Directs environmental activities in a way that supports other policy elements..
- It is committed to continuously improving its environmental performance.
- Uses methods that reduce the consumption of natural resources.
- Reduces consumption by increasing energy efficiency.
- It tries to use energy obtained from renewable energy sources..
- To reduce water consumption and to ensure clean water consumption by having water analysis done regularly. To prevent wastewater from mixing with clean water sources.
- Reducing/eliminating greenhouse gas emissions.
- It focuses on re-use and return/evaluation processes.
- To organize their work in a way that does not harm animals and other living things in the natural environment.
- Efforts to reduce (and eliminate) ozone-depleting substances (ODS)..
- Works to reduce (and eliminate) energy and GHG,
- The Ozone Depleting Substances management process aims for compliance,
- Decarbonization
- Biological diversity, land use and deforestation
- Soil Quality

HWASEUNG BULGARIA	<b>ENVIRONMENTAL POLICY</b>	Doküman No: ÇYS-PH01 Yayın Tarihi: 07.01.2024 Rev. Tarihi: 03.10.2024 Rev. No: 04 Sayfa No: 1/1
-------------------	---------------------------------	---

- **Noise emissions**

- Air quality monitoring: Fixed monitoring stations are established to measure the concentrations of pollutants such as sulfur dioxide, nitrogen dioxide, and particulate matter. This data is supported by methods such as emission inventories and air quality modeling.
- Air quality index (AQI): Used to evaluate the quality of the air that people breathe. AQI classifies the air as good, moderate, sensitive, unhealthy, bad and dangerous.
- Air quality limit values: Determined to protect human health and prevent negative effects on the environment. Turkey aims for European Union limit values.
- Role of local governments: Investigating the effectiveness of environmental expenditures in improving air Quality
- To promote continuous improvement in safe chemical management and to achieve excellence in environmental, health, safety and security performance.
- Sustainable resource management is to ensure that natural resources are used effectively and responsibly without compromising the ability of future generations to meet their own needs.
- In environmental management, waste reduction aims to reduce the environmental impacts of waste production, as part of waste management. This includes protecting natural resources, reducing greenhouse gas emissions and mitigating the environmental impacts associated with waste disposal.
- Managing the provision of benefits such as reuse (reuse) and recycling (recycling) environmental management, conservation of natural resources, energy conservation and reduction of environmental pollution

Animal welfare environmental management, ensuring the physical and psychological well-being of animals.

- 1-Conservation of biological diversity: Healthy animals are more productive in their natural habitats and contribute to the conservation of biological diversity.
- 2-Environmentally friendly production: Improving animal welfare is a part of sustainable livestock practices and ensures the preservation of ecological balance.
- 3-Protecting public health: Ensuring animal welfare, reducing the risk of disease transmission.
- 4-Taking some measures to ensure animal welfare in environmental management.
- 5-Sustainable agriculture practices: Promoting more humane and environmentally friendly methods instead of intensive agriculture.

HWASEUNG BULGARIA	<b>ENVIRONMENTAL POLICY</b>	Doküman No: ÇYS-PH01 Yayın Tarihi: 07.01.2024 Rev. Tarihi: 03.10.2024 Rev. No: 04 Sayfa No: 1/1
-------------------	---------------------------------	---

Biodiversity, land use and deforestation are interconnected in environmental management and evaluating these factors is essential for sustainable development.

Soil quality is an important element of environmental management, ensuring the sustainable use and protection of soil resources.

Accordingly, as HWASEUNG BULGARIA, we undertake that we will determine our Environmental Goals, constantly review our goals and disseminate this policy among all our employees /subcontractors/suppliers, in this direction, we will comply with the applicable customer requirements, legal requirements / regulations that we are responsible for related to our environmental dimensions, which are other requirements, and we will work effectively on continuous development and Decontamination.
